LOGO IMAGE PROMPT

--HERE IS THE PROMPT YOU COPY AND PASTE INTO CHATGPT.--

--AT THE VERY END REPLACE [BRANDED NAME] WITH YOUR BRANDED NAME KEEP IT IN QUOTATION MARKS---

Branded Name & Logo Prompt Pack

From Copilot with Dave

Want to brand yourself properly without paying an agency a fortune?

Here are two copy-and-paste prompts you can drop straight into ChatGPT (or your AI tool of choice) to generate **killer brand names and logos**.

Branded Name Prompt

Copy this and replace the text in [BRACKETS] with your details:

I'm creating a [PRODUCT / WEBSITE / PROJECT] and need a great sounding, branded name. The [DESCRIPTION OF PRODUCT / WEBSITE / PROJECT].

Give me:

- 10 names with strong phonetic appeal (easy to say, easy to remember)
- 10 names using alliteration
- 10 names using rhyme

Example:

I'm creating a digital product about outdoor survival. Give me 10 names with phonetic appeal, 10 using alliteration, and 10 using rhyme.

👉 Result: You'll instantly get 30 potential brand names to choose from.

Logo Image Prompt

Copy this into ChatGPT. At the very end, replace **[BRANDED NAME]** with your chosen name (keep it inside quotation marks).

You are a professional prompt engineer. Your goal is to create detailed, creative, and effective prompts for generating high-quality logos for digital products.

When a user provides a product name, combine the following elements to create 10 professionally written prompts that can be used in image generation AI software to create a high-quality, recognizable, stylish, and creative logo.

Here are the design principles to consider:

- Memorability: Distinctive enough to be recalled.
- Color Psychology: Colors that evoke trust, excitement, or authority.
- Relevance: Must connect to the brand's identity & industry.
- Balance & Proportion: Clean, visually appealing design.
- Typography: Clear, legible, professional.

- Emotional Connection: Logo should feel personal and trustworthy.
- Shape Psychology: Circles = unity, Squares = stability, etc.
- Symmetry: Balanced, pleasing layouts.
- Depth & Dimension: Subtle effects to add interest.
- Subtle Details: Small design touches for sophistication.
- Contrast: High visibility, stands out.
- Emotional Balance: Strong, but not overwhelming.
- Intuitive Design: Instantly recognizable.

When generating, start by describing the image element, icon, and style. Then add the following instruction:

"Write in English text letters and words the following: "[BRANDED NAME]". Add nothing to these text letters or words and leave nothing out. Write the words and letters exactly as they are presented. The design should feel intuitive and instantly recognizable without requiring explanation. The logo should create an emotional connection with the audience."

Make each prompt in one paragraph, no bullet points, no background gradients.

 **Example (with product name “*Six Figure Mindset*”):**

- *“Create a modern, minimalist logo featuring a mountain silhouette and a cross icon using cool blue and white colors to evoke trust and security. Write in English text letters and words the following: “Six Figure Mindset” ...”*
 - *“Design a nature-centric logo with a leaf and tent icon using vibrant green and earthy brown colors to represent sustainability and adventure. Write in English text letters and words the following: “Six Figure Mindset” ...”*
-

How to Use This

1. Run the **Name Prompt** → brainstorm your brand names.
 2. Pick your favorite.
 3. Drop that name into the **Logo Prompt** → generate 10 logo ideas.
 4. Boom  You’ve got yourself a brand.
-

⚡ **Copilot with Dave Tip:** Don't overthink it. A simple name + a clean logo = way more powerful than some over-engineered "guru brand."
